Experience

Software Developer Apr 2024 – Present
Benex Technology Istanbul, Turkey

- Co-built a multi-tenant signage SaaS from scratch running 400+ screens for 200+ users at global hotel chains
- Unified 9 IoT commands across 7 device platforms behind 1 idempotent queue, wrapping each native API
- Designed a 130-route Express API with 21 MongoDB models and role-based access control (94 permissions)
- Streamed live content updates to screens with MongoDB Change Streams and Socket.IO, resilient to failover
- Built synchronized playback across Samsung Tizen, LG webOS, and Android screens with 10+ content types
- Migrated FFmpeg transcoding and Stripe webhooks from the API to Azure Functions and Service Bus queues
- Automated Jira tickets end to end with a 7-agent Claude Code pipeline that plans, codes, tests, and reviews
- Integrated Canva, live flight schedule, and weather feeds as dynamic screen content

Software Developer (Contract) July 2026 – Present
ML Marketing GmbH Remote

- Built and operate a live serverless analytics platform on AWS for 100+ users tracking 5 social networks
- Built a multi-stage AWS CDK (TypeScript) ETL pipeline: EventBridge, Lambda, S3, and Aurora PostgreSQL
- Avoided about $75 per month in NAT Gateway fees via RDS Data API access and a scale-to-zero database

Sound Engineer June 2017 – Apr 2025
Freelance Istanbul, Turkey

- Delivered sound design for GAP, Vogue, Migros, and Turkcell, plus a Michelin-starred restaurant documentary

IT and Networking Intern Nov 2015 – Jan 2016
Migros Istanbul, Turkey

- Secured cloud systems and internal network infrastructure during cybersecurity assessments

Skills

Languages: TypeScript, JavaScript, Python, SQL
Frameworks: Node.js, Express, FastAPI, Celery, Socket.IO, React, Next.js, PyTorch, Hugging Face Transformers
Cloud: AWS (CDK, Lambda, Aurora, S3, EventBridge), Azure (Functions, Service Bus, App Service)
Data and Tools: MongoDB, PostgreSQL, Redis, Git, GitHub Actions, Docker, Stripe, FFmpeg

Projects

AI Crypto Trading Bot (X Sentiment Analysis)
github.com/bbelbuken/elontweetbot

- Scored live X (Twitter) posts with a Twitter-RoBERTa model in PyTorch and Hugging Face Transformers
- Fused sentiment with a weighted 70+ term crypto lexicon into a 0-100 signal score that triggers trades
- Served inference on Celery and Redis workers behind FastAPI, containerized with Docker Compose
- Executed trades on Binance Testnet with stop-loss, take-profit, and daily drawdown limits

Education

Bahçeşehir University June 2016
Bachelor of Science in Computer Engineering
